

B. Tyler Sexton

Greater Murfreesboro 37128 | contact@nottyxton.net
Portfolio: nottyxton.net | GitHub: github.com/Tyxton

PROFESSIONAL SUMMARY

Systems & Infrastructure Engineer with a focus on high-availability monitoring and full-stack automation. Engineered a 48TB production-grade storage environment and lead developer of Gamearr, an open source application for automated media management. Proven ability to manage complex automated workflows and resolve critical system latency issues.

TECHNICAL CORE COMPETENCIES

- **Systems Infrastructure:** Custom PC Hardware, Enterprise Storage (ZFS/TrueNAS), Networking, Linux/Windows OS Administration, Ansible, IaC
 - **Networking:** UniFi Stack, VLAN Segmentation, TCP/IP, DHCP, DNS, WireGuard VPN
 - **Hardware Operations:** Component-Level Diagnostics, Precision Soldering, Schematic/Blueprint Interpretation, Kanban Workflow Optimization
 - **Operations & Leadership:** Team Training & Coaching, Schedule Management, Incident Resolution, KPI Tracking
 - **Virtualization & Containers:** Proxmox VE, KVM, Docker, Portainer, LXC
-

PROFESSIONAL EXPERIENCE

Aristocrat Gaming | *Electronics Repair Technician* | Apr 2025 – Dec 2025

- **Hardware Forensics:** Performed component-level diagnostics, circuitry repair, precision soldering, and preventative maintenance for high-availability enterprise gaming hardware.
- **Process Adherence:** Evaluated technical schematics and blueprints to isolate system faults, swap failing components, and re-test electro-mechanical assemblies to 100% quality compliance.
- **Process Efficiency:** Utilized a Kanban system to maximize throughput in a hardware production environment.

Domino's | *Store Manager* | Apr 2024 – June 2026

- **Team Management:** Supervised a diverse staff of 15+, managing scheduling, training, and performance coaching to meet operational deadlines.

- **Inventory & Assets:** Managed daily inventory tracking, labor variances, and cash deposits, ensuring strict adherence to loss prevention protocols.
- **Operations:** Led open/close procedures and served as the primary manager-in-charge for high-volume shifts.
- **System Reliability:** Maintained local point-of-sale (POS) terminal hardware and network connectivity to prevent operational downtime during high-volume shifts.

Jiffy Lube | Service Technician / Lead Customer Service Advisor | Aug 2025 – Apr 2026

- **Sales Leadership:** Acted as floor leader, ensuring all customers were presented with credible technical solutions; **doubled Multicare service sales** through high-integrity diagnostic reporting.
- **Hardware & Network Maintenance:** Diagnosed and repaired local shop bay computing hardware, automated diagnostic tool interfaces, and managed local network/POS connectivity to ensure zero-downtime operations.

PROJECTS: SYSTEMS INFRASTRUCTURE & HOMELAB

Lead Systems Administrator | 2018 – Present

- **Systems Infrastructure Project:** Independently engineered a 48TB production-grade homelab. This architecture features both Private and DMZ services, VLAN isolation, GPU passthrough, containerization, as well as separated compute and NAS.
- **PVR Project:** Developed Gamearr (Python/FastAPI/SQLite); engineered hardware-aware resource management for NAS-side health and multi-platform (ARM64/x86_64) Docker deployment.
- **Live Portfolio:** nottyxton.net is hosted as a live demonstration of my homelab, as well as documentation of various internal projects and studies.

EDUCATION & CERTIFICATIONS

- **CompTIA ITF+ Certification**
- **Rockvale High School** (Focus: Computer Engineering and Computer Science)
- **BS Computer Engineering / Minors in Computer Science and Information Systems** (Partial/In-Progress)
